Bluetooth receiving device in the following manual means Bluetooth music receiver, Bluetooth headset, Bluetooth speaker;.

Notes

- 1.The battery may fail for new machine or the machine which has not been used for quite a long time. If it occurs, just charger it to full power before using it;
- 2.Keep it far away from high temperature and damp environment; place it in ventilated and dry environment. Exposure to rain and severe shock are forbidden!
- 3.Do not open the cover optionally to avoid electrical shock or any other accidents. For repairs, please ask help from our company's repair service center or related professional personnel.
- 4.If any metal part or liquor drops into it, switch off the power at once. Do not use it before professional's checking;
- 5.Turn it off when you do not use it.

Operation Steps

Transmit Audio:

- 1.Connect this Bluetooth music transmitter directly to audio device (such as TV, DVD, MP3 etc) with audio cable (3.5mm or 2*RCA);
- 2.Turn on this transmitter by pressing the middle button for about 5 seconds, when the red LED and the blue LED flicker alternately, means this transmitter is in pairing mode;

- 3.Turn on the Bluetooth receiving device, and make it to pairing mode, they will pair each other automatically;
- 4.When the red LED lamp becomes off and the blue LED turns on continually, it means they have paired successfully. You can play music wirelessly.
- 5.If you want to change to pair with another Bluetooth receiving device, please turn off the connected Bluetooth receiving device, then pair the new Bluetooth receiving device with Bluetooth transmitter again from step 1 to step 4;
- 6.This transmitter has memory function: When this transmitter pairs with one Bluetooth receiving device first time, it will need about 10 seconds. After one time successful pairing, next time when turn on them, they will pair each other automatically, only need 3 seconds;
- 7.According to your favor, you can press the side button to adjust the volume, press the middle button to play or pause;

Transmit voice

If you want to transmit your voice, just plug out the audio adapter, it will switch to microphone mode, you speak into the microphone, and then your voice will be transmitted to Bluetooth receiving device;

After you plug the audio adapter to the transmitter, it will switch to audio transmitter mode, when you speak; your voice won't be transmitted to Bluetooth receiving device;
